

23 Mahoneys Road, Riddells Creek 3431

Philosophy

Our philosophy is guided by a strong emphasis on Language and Literacy as well as S.T.E.M subjects such as science and numeracy. Our environmental education program sees us learning in depth about the natural world, embedding principals also of sustainability and recycling. Children's interests motivate play choices and curriculum development. We also utilize the knowledge and interests of educators which sees us incorporating activities such as weaving, cooking and drama into our program.

Features

- Large, natural, playground with lots of opportunities for children to engage with the natural world. A large garden space which has many trees and plants.
- Vegetable garden, fruit trees, berry bushes, worm farm and compost bin complement our environmental education program.
- Resident animals including chickens, budgies and fish.
- Digging patch, yarning circle, colourful garden, boardwalk and mud pit
- Environmental program focusing on recycling and sustainability practices
- Library borrowing program for the children. Healthy eating and living program which promotes understanding of healthy life choices. We are members of Smiles
- 5-7 incursions each year as well as a visit from Sunbury Dental Clinic
- Recently refurbished facility and co-location with Maternal and Child Health Service
