Please share your feedback.	Draft budget item. Upgraded lighting at Lancefield park. I believe this to be imperative for the following reasons. Child safety when training after 5 pm on Winter. Coaches, support staff and parents are unable to see location of children clearly due to dark lighting Children are unable to see where other groups are, which may lead to collisions or injuries. Children need to feel safe in a well lit area for training and games which encourages participation in sport and recreational activities.

Please share your feedback.	In respect of funding I would like to draw your attention for the need to upgrade the lighting at Lancefield Park. As an assistant coach of one of the football teams my observation is that our facilities would be in the bottom 5% in the state with respect to lighting. The continued growth of active participation the long term needs to improved lighting is clear. Safety is a key aspect to this. When comparing the lighting of this facility with every ground I attend it is clear we need works completed to get to 2021 standard. I personally support the submission by the Lancefield club and look forward to the council's support also. This facility has so much potential for the broader community but does need government support to keep up with the standards of so many other sporting facilities across the state. Regards

Please share your feedback.	Please consider a lighting upgrade for the ovals at Lancefield Park. Currently there is insufficient lighting for multiple groups to train concurrently. This is not just a matter of convenience for parents who would like to have their children training at the same time, or for the club to build comraderie between age groups and the male and female teams. Most importantly it is for safety. Training in poor lighting conditions can lead to injuries through not being able to see the ball, teammates and any surface issues that may be present. Thank you for your consideration.

Please share your feedback.	Appropriate upgrade to the Lancefield Park oval lighting - including lighting to the side -second oval space Lancefield Park is a great facility and plays an important part in our community- if an upgrade to the lights on the main oval and additional lights be installed to the adjacent grass area it will provide a safe place for our junior and senior clubs to train and can expand the use of the space up after dark for other events or uses The current lights on the oval are deficient and can not provide the required level of consistent lighting to allow for safe training across the whole oval. The second training space has no lighting at all. Any assistance from Council to make the park safe and user friendly for the many groups and clubs by installing appropriate lighting is greatly appreciated Kind regards

Please share your feedback.	It is great to see the council allocating funds to Lancefield precinct for sport and recreation The absence of adequate lighting on the oval is a serious health and safety issue greatly limiting the use of Lancefield oval for junior sport and training With adequate lighting the precinct could be utilised for much more community events as well as sport, both senior and junior including football, cricket, relay for light, show etc Great job by Council officers and support by councillors

As	of the	, I was pleased to read of the proposed allocation
of \$348,0	000 for work on the roof of the tw	wo story bluestone building (former Bank of NSW) in the
Kyneton	Museum precinct. This work is u	rgently needed and I commend Council for this decision.

I was also pleased to see that the initiatives to improve the built environment of the Shire include "Progress with the design/planning program for Kyneton Museum". (p22)

In the context of enhancing the Social and Economic environment I endorse the proposals for a "program of performance, visual arts, cultural and heritage events" and the plan to "Foster historical interest, preserve and collect social history items, and present contemporary exhibitions and public programs at Kyneton Museum." (p24).

I believe that the Museum also plays a role in promoting community health and wellbeing through the active team of volunteers and "Friends" who provide "hands on" support and financial support for the Museum. Many of those of involved are older members of the community for whom this provides a sense of purpose and social connection.

I would also like to commend Council on the decisions to commit to a full time Heritage Planner position and to a Macedon Ranges Shire Thematic Environmental History.

All of these decisions reflect Council's commitment to valuing, celebrating and protecting the considerable heritage assets of our part of Victoria.

Please share your feedback.	I am writing to you to ask for funding to upgrade the Lancefield football oval lights. At the current state of the lights training is very difficult and only half the oval is lit up. My and all play for the football club and love playing footy but training is very difficult when they can not see the ball to mark it or pick it up. We have had car headlights on around the ground to offer a slight help to the kids. With better facilities it will only encourage more kids to get involved in local sport. The Lancefield football netball club is a very friendly, community minded club and with this grant it will help improve the experience for all. Thanks

Please share your feedback.	Main oval lighting upgrade at Lancefield Park: - My AFL at Lancefield Junior Football Club. For the Club's players, coaches, volunteers, etc. their safety should be paramount. Lighting at the ground is extremely inadequate and is in desperate need of upgrading. As they train in the non daylight saving period, adequate lighting is a necessity. The care and wellbeing of the players is vital.

Please share your feedback.	We desperately need to upgrade our facilities at New Gisborne Tennis Courts. There are no existing lights on Courts 1 and 2, with the obvious impacts being they cannot be used by New Gisborne or other clubs for night tennis competition (both social and competitive), cannot be utilised by coaches and cannot be used by the increasing number of people with flexible working arrangements who might find night time a suitable option. The current lighting scenario is severely hampering our ability to offer our facilities to an ever-increasing membership and the broader New Gisborne community. We are requesting funds to install LED light towers on Courts 1 & 2 and upgrade from Halogen to LED lighting on Courts 3 & 4.

	Hi- as a new member of the and now a committee member, I want to support their submission for new lights at their courts. As a club we have grown from 20 to 70 members in 12 months. We have 5 new committee members, all have kids having lessons and/or playing in competition now. We are working on a new long term marketing strategy to attract more members. We have several new sub divisions developing in the area, and the potential for new member is huge. If we have new lights, we can offer more lessons, and develop more kids through the club.
Please share your feedback.	There has also been an exponential growth in use of the courts both during the day and on weekends in the last 12 months. This includes many families and kids. It is great for their fitness and well-being. Rate payers are embracing tennis in our area.
	I a m also a member of the New Gisborne team on a Wednesday night, and on two occasions this year we were unable to play due to lighting issues.
	Please support our submission to get new lights for both of our courts. It is a very important resource for for our community.
	Thanks for your time.

	Kind regards

Please share your feedback.	Hello, I am a club. I also play Wednesday night competition, and my and I also have weekly lessons at the New Gisborne Courts. We desperately need new lighting on the courts so we can safely train and play. Numerous times we have embarrassingly had to forfeit or request to move competition due to not being able to play after wet weather. Courts 3&4 are not suitable to play on when wet due to bad drainage, yet these are the only courts with lights. If we had lighting on courts 1&2, then we would have an alternate option. In addition, when playing recreationally, more than two games can take place once it starts getting dark and recreational games can coincide with scheduled training sessions. The current lighting is also terrible when playing in the dark as they cause blind sp ots in your eyes when you inevitably look up at them. This obviously cannot be avoided whilst playing tennis, so upgrading to LED lights should alleviate this and also reduce ongoing upkeep. Thank you for the consideration. Hopefully with improved facilities, the club can continue to grow and local families can increasingly make use of the courts.

RE: Draft Budget/Revenue and Rating Plan feedback (2021/22)

Dear Mr O'Sullivan

In the past year the committee and members of the Woodend Golf Club have worked hard to overcome the challenges of COVID. Some of the significant achievements of the club and committee include:

- growing our membership from around 120 in Feb 2020 to a current number of 250
- applying for grants and following sound financial management to improve our financial position to maintain our payroll commitment and other operational expenses
- grown our junior membership to 30 and started a junior clinic programme on Tuesday evenings which has had up to 40 juniors enrolled
- undertaken improvements to the greens and fairways

In the 2000/21 Budget Report, Macedon Ranges Shire Council set aside \$200k to bring the Woodend Golf Club Clubhouse up to Building. Apart from the replacement of some bearers underneath the bar area we have not seen any evidence that any works have been undertaken.

Some of the concerns we have with our facility are:

- disability access we have a member with MS who has great difficulty getting in and out of the club rooms
- safety of the access points many of our members are elderly and there is a significant trip, slip and fall hazard around the entry points, particularly in winter when the clay is slippery
- rising damp
- mould
- vermin accessing the kitchen from outside via rotten boards
- ability to cater for major events the club purchased and installed three ovens
 which we use for catering purposes on our large event days like the Woodend
 Open. Council officers have placed out of service tags on two of the ovens and
 have said that there are no plans to replace or repair

Essentially as a club we have survived for 115 years thanks the efforts of our members. The lack of communication from Council as to plans for repair / replacement of our clubhouse is causing concern amongst our members and is making it difficult for the committee to plan for the future. **There is also a**

significant risk that someone may be injured because the building is not up to building code.

When reviewing the Draft Budget for 2021/22 the \$200k does not appear in the carried forward items.

ACTION: MRSC to update the Draft budget to include this amount in the carried forward items

When reviewing the Capital and Recurring Programs and Projects we can see that there has been projects set aside for Kyneton Rifle Range for Clubrooms renewal and toilets renewal. We cannot see Woodend Golf Club mentioned here at all. We would like Macedon Ranges Council to explain how Kyneton Rifle Range has been prioritised above Woodend Golf Club when:

- a) Woodend Golf Club has 255 members, much higher than the membership of any club affiliated with Kyneton Rifle Range
- b) Our membership includes 30 juniors, many women, people of all ages and people with physical and intellectual disabilities
- c) There was no mention of Kyneton Rifle Range in the 2020/21 budget

Action: MRSC to explain how the Kyneton Rifle Range clubroom and toilet has been prioritised over the Woodend Golf Club given the greater community benefit and greater diversity and inclusion of our club.

Regards

Appendix 1. Extract from Budget Report 2020/21

The below image is an extract from the 2020/21 budget report.

Note that Woodend Golf Club is listed for Club House Works. As mentioned we have see no evidence of any works being completed.

Also note that there is no mention of Kyneton Rifle Range.

TOTAL INFRASTRUCTURE	10,416	6,300	3,022	1,094		9,131	-	800	485
TOTAL CARRIED FORWARD CAPITAL WORKS 2020/21	12,016	7,900	3,022	1,094		10,731		800	485

⁽¹⁾ Reflects material projects identified for carry forward from the 2020/21 financial year. All final amounts of project carry forwards will be identified post-June 30 2021, when all expenditure has been determined for the financial year. Formal approval will then be sought to carry forward these amounts.

Appendix 3. Extract from Draft Annual Budget 2021/22

The below image is an extract from Capital Recurring Programs and Projects Items in the Draft Annual Budget 2021/22.

Note that there is no item for Woodend Golf Club, Club House Works.

Note that Kyneton Rifle Range is listed for Clubrooms renewal and Toilets renewal. We would argue that there is less community use and by a less gender and age diverse range of community members of the Rifle Range than there is of the Woodend Golf Club.

4.7 Capital Recurring Programs and Projects

Building renewa	l program	2021/22	Total \$3,150,000		
Locality	Ward	Building / program	Details and comments		
BOLINDA	East	Bolinda Hall toilets	Renewal fitout

Appendix 4. Extract from Draft Annual Budget 2021/22

The below image is an extract from Potential Future Capital Projects Items in the Draft Annual Budget 2021/22.

It appears that the work to bring the clubhouse up to building code that was planned for 20/21 was not only not completed but also not carried forward and has now gone from a committed project in the previous year to a "potential" project with no committed timeframe.

Gisborne Skate	Park – construction
Kyneton Museu	m Roof Works – construction
Kyneton Showg	rounds Master Plan Implementation – Asphalt Works
Kyneton Town	Hall – Theatre and Meeting Room Refurbishment construction
Malmsbury Med	hanics Institute – construction
Malmsbury Red	reation Reserve Change rooms – construction
New flagpoles &	k planning for flagpole illumination
Red Brick Hall - Works	- On-street Disability Discrimination Act Car Space and Building Renewal
Riddells Creek	Exercise Equipment
Riddells Creek	Leisure Centre multipurpose room extension – construction
Riddells Creek	Lions Park Pavilion – upgrade
Riddells Creek	Tennis Club modular change rooms – construction
Recreational Ve	hicle Dump Point – construction
Secure Electron	ic Key Cabinet
Woodend Com	munity Centre – construction
Woodend Golf	Club – new clubhouse building – construction

As these projects may occur in the future and costs change over time, no amounts have been quoted at this time. Analysis of likely costs will be considered when the initiative or project is to progress further in a budget allocation process.

Please share your feedback.	& I are so of New Gisborne Tennis Club, we play socially & he plays with others senior men every Monday afternoon. We support the clubs budget submission to fund converting the existing lights to LED globes, environmentally friendly, 50% more cost effective & easier to maintain. Lighting the other two courts would also enable more players to participate in night tennis, more coaching under lights & provide more community friendly access for all.

Please share your feedback.	There needs to be climate change action plan budget allocation, which engages young people living in the ranges to achieve sustainable change, therefore the two FTE should be young people who have demonstrated expertise in working with community and expertise in environmental restoration. Funding to improve the health of our many waterways invite Ozfish CEO: https://ozfish.org.au/ and local resident to talk with Council about water restoration in this region.

Please share your feedback.	I'm thrilled to hear that the New Gisborne Tennis Club has applied for an upgrade to the lighting at their facility. As a with an interest in tennis, it would make it so much easier be active, outdoors, close to home, and enjoying the sport I love at a time of day that I can. It's also important to me that my children will have the opportunity to be coached and enjoy the sport that I love, at a venue close to home which is safe.

5 June 2021

Mr Bernie O'Sullivan Chief Executive Officer Macedon Ranges Shire Council PO Box 151 Kyneton VIC 3444

Re: DRAFT ANNUAL BUDGET 2021 / 2022

Dear Bernie

The thanks you for the opportunity to comment on the MRSC's 2021-22 Draft Budget.

This submission is focused on a step in the staged implementation of the 2016 Master Plan and is requesting funds be allocated to the New Gisborne Tennis Club Lighting Project to install LED lighting on two courts & upgrade to LED lighting on the other two courts from Public Open Space South Reserve.

Located behind Ross Watt Reserve in Station Road, the NGTC has seen a steady increase in numbers over the past few years with a current membership of 70. This consists of senior and junior players, of both gender, who represent the Club in various summer and winter competitions.

The club coach, also coaches and trains over 75 children of all ages throughout the year. The courts are utilised on a casual basis by members of the community, and the Gisborne Tennis Club also uses the New Gisborne courts on a Thursday as their home court. The recent increase in membership can be largely attributed to the standard of coaching offered by Scott, and the subsequent enjoyment families are finding in playing such an inclusive, all-abilities sport.

However, the current lighting scenario is severely hampering the Club's ability to grow and to offer the facilities to an ever-increasing New Gisborne community.

There are no existing lights on Courts 1 and 2, with the obvious impacts being they cannot be used by New Gisborne or other clubs for night tennis competition (both social and competitive), cannot be utilised by coaches and cannot be used by the increasing number of people with flexible working arrangements who might find night time a suitable option.

Courts 3 and 4 are currently lit by 1000 Watt halogen tennis lights. The proposal to replace these with new 500 Watt LED Sports Lights has a number of benefits, including a 50 percent reduction in power usage compared to the existing halogen globes. The current globes incur an ongoing maintenance cost as around 2-3 need to be replaced each year. Not only does this come in the form of paying for an electrician and scissor lift, at a cost of \$300 – 400 per job, but the courts are left in suboptimal playing condition while waiting for the replacement job to take place. The Club currently meets all operating and maintenance costs.

This project falls firmly within the priorities of Health and Wellbeing in the Council Plan. While facilitating physical activity, improving the use and accessibility of the current courts will also foster social connection and inclusion. The movement from halogen to LED lighting will result in lower operating costs for the club and has a clear and direct environmental benefit through substantially lower power usage.

In reviewing the MRSC Draft Budget, we note with particular interest the \$280,000 commitment to the Gisborne Tennis Club's lighting replacement project. Steady development has occurred in the New Gisborne region in recent years resulting in financial contributions to Councils Public Open Space cash reserves. This includes adjacent to Baringo cafe, adjacent to Saunders Rd/Station St intersection, Ferrier Road and an increased population growth and tennis court usage.

I enclose a letter of support from the support from the proposal. It is vitally important to increase the number of lit tennis courts to permit night tennis to support the growth of tennis in the Macedon Ranges.

We understand the Regional Sports Precinct project has a high profile and focus, however the current Council assets need continued maintenance and improvements. It should also be noted that the NGTC Lighting Project will have no impact on other projects in the draft budget and can be delivered in 21/22 financial year.

The table below presents the overall budget requirement. Attached to this submission are quotes for the installation of lights on Courts 1 and 2, and the upgrade to lights on Courts 3 and 4.

Project Stage	Cost Estimate*	Timing
Courts 3/4 upgrade to LED lights Replace existing halogen light boxes with LED (per attached quote) Mains power and switchboard have been inspected and are suitable 20% allowance for price escalation and contingency	\$27,270	3 months from funding
Courts 1/2 new light towers - New light towers per attached quote - Allowance for new switchboard and run mains power \$3,000 - 10% allowance for contingency	\$67,070	6-9 months from funding
TOTAL	\$ 94,340	

^{*} No allowance for council permitting, project management or other internal charges.

Thank you for your consideration and we look forward to a positive outcome.

5th June 2021

RE: NEW GISBORNE TENNIS CLUB – COURT LIGHTING

is writing to offer our support to New Gisborne Tennis Club (NGTC) in their pursuit to improve and upgrade the court lighting facilities at their venue.
NGTC is a very committed club in supporting the numerous tennis competitions on offer through the plays a very active role on the committee.
NGTC has had a resurgence of member growth over the past 12-18 months and is now serving a number of junior players and teams in both coaching and in competition play.
The currently runs 3 night competitions (Thursday Night Open, Wednesday Night Women's comp and Friday night juniors). Thursday night competition has had tremendous growth in participation numbers over the past few years and the new Wednesday night competition kicked off its first season in Autumn 2021, which is proving already to be very popular, and is also likely to grow quickly over the next few seasons. Given this growth in tennis participation MRTA needs to fully utilise all current courts in the shire to meet the demand. NGTC currently only has 2 courts under lights which means that it is only possible for them to have a maximum of 2 teams in any of these competitions.
Coaching numbers have also grown significantly at NGTC under head coach from however it will be difficult to grow his business any further at this point due to only 2 courts being under lights. Junior's coaching is delivered during week days after school hours, it is just as important to support this cohort of players, to enable them to participate in a sporting activity, get the best out of their tennis and reach their full potential. would like to grow coaching numbers and provide employment opportunities for new coaches in the area. This will be difficult in the winter months as it is dark by 5:30pm and only limited coaching numbers can be accommodated on just 2 courts.
Without access to all of their courts during night time hours, I cannot see how NGTC can either retain members or grow their club.
This also has serious knock on effects for other clubs in the , as we rely on access to all courts across all venues for our competitions to run successfully and to meet the current demand. Thursday night comp is already at fully utilised court capacity for most venues and some other venues do not have enough courts under lights to sustain their own teams, these clubs look to other clubs to host matches and share courts.
Given that there are no plans in the MRSC strategic plan to build any new tennis courts in the foreseeable future, we really need to upgrade and maintain the courts we currently have and that includes getting all available courts under lights for full utilisation. New Gisborne is a fast growing area and night tennis is proving to be a popular sport.
I really hope that NGTC is successful in their quest to secure funding to upgrade the lighting on their 2 existing courts and to be able to add new lighting for the other 2 courts.
Please contact myself or the for any further assistance in this matter.
Kind Regards,

Please share your feedback.	The updgrade to the oval lighting at Lancefield Park is urgently needed. The current lighting is extremely insufficient for the community as it does not light up the whole oval, especially in the areas that are most important. In addition, the current set up is costly to run, as the lights are not modern LEDs. This is the only oval in the whole shire that does not have up to standard lighting. I urge you to please keep this upgrade in the final budget for the benefit of the whole community.

Please share your feedback.	I hope the tennis allocation does not include an allocation of funding from the Telstra tower funds as the Rec Reserve committee has not met and allocated any funding to this project. I would expect that the Tennis club has already received their fair share of funds from these monies and funds may be allocated to the netball court or oval lighting.

Please share your feedback.	To whom it may concern, We would very much like to see badly needed improvements to the Gisborne Tennis Club courts, particularly improvements to the lighting on the main 4 courts of competition. The GTC is only a small Club compared to the Football/Netball Clubs and for years we have watched at upgrades to ovals, clubrooms, and lighting have been completed, and most of our courts until very recently, have fallen into disrepair so badly that they have been unplayable. Please give consideration to improvements required on the lighting at Gisborne Tennis Club. Regards,

Draft Budget/Revenue and Rating Plan feedback (2021/22)

Have your say

My comments relate to protecting environmental assets as they underpin social and economic issues. The allocated amount has decreased slightly in the current draft Budget compared to 2019-20. Some of last year's allocation was not spent due to Covid, and this should be allocated in addition to the current year's Budget, if vital work is to continue and be improved upon (eg weed management and cultural/burn programs critical to fire mitigation and habitat protection; internal processes like staff training and improved communications materials).

Please share your feedback.

I welcome the Waterways conservation works, but considering that MRSC has declared a climate emergency I note a lack of funds for climate change adaptation in all areas of Shire activities except building upgrades, and urge increased allocation of funds. Facilitating Cool Changes is the only initiat ive mentioned - the Environmental Policy and Sustainability Officer responsible for this will be hard pushed only working 3 days per week. A bushland reserve hydraulic tipper box trailer is a welcome addition as long as it is also used for roadside maintenance works to mitigate damaging past practices to vegetative habitat. The draft Roadside Conservation Management Plan is a well-researched and balanced discussion of the issues surrounding the ecological values within roadsides, fire risk mitigation and road safety. For the vital actions listed on p60> extra resources between \$5000 and \$25000 are required for some actions (ie EPBC assessment of certain roadsides, signage updates, marker pole stickers for

	Council Operations staff) in the next 2 years and I ask that these be budgeted for in the current draft Budget for 1921-22. It is regrettable that actions like spoils management and restoration rely on large dollar amounts (\$50-100,000) and have to be medium or I ong-term rather than being given a higher priority.

1. Macedon Ranges Shire Council roads will be safer for wildlife and people if Virtual Fencing could be trialled in the Shire.

The Virtual Fencing device is activated by approaching headlights, which causes it to emit a combination of sound and light stimuli that alert and repel animals from the road side. This alert system of audible alert and blue and yellow strobe-type LED lights are an innovative concept based on proven technologies.

The devices are placed at 25-metre intervals on alternating sides of the road. They are triggered in sequence by the vehicle headlight as a car approaches along the road, forming a virtual fence.

The Virtual Fencing system offers following benefits:

- Proven reduction of accidents, injuries and fatalities
- Outstanding cost-performance ratio
- Low maintenance costs
- High reliability and ruggedness
- No obstruction of gene pool flow
- No known habituation effect.

Please consider Virtual Fencing for the Shire's Roads. The Surf Coast Shire will be trialling the technology on a stretch of Forest Road near Anglesea.

Wildlife Safety Solutions | Virtual Fencing | Australia & Tasmania

2. Speed signs of 60 km per hour should be placed at regular interval along the dirt section of Gap Road Riddells Creek, and along Sandy Creek Road Riddells Creek and Shannons Road New Gisborne. These roads are frequented by wildlife and speeding cars.

How did you find	Other: Informed by council worker that we were included in
out about this?	the draft budget.

6th of June 2021

RE: Macedon Ranges Shire Council, Draft Annual Budget 2021/22.

Firstly, as a volunteer club, we are grateful that the Macedon Ranges Shire Council (MRSC) has acknowledged the work that we do for the community and included us in the <u>Draft Annual Budget 2021/22</u>.

Secondly, in relation to the MRSC condition audit to replace the dog club building at Barkly Square in Kyneton, we look forward to being included in the consultation process with the aim to assist the MRSC in facilitating the best possible outcome for our club and its members. Please see our contact details above so that we can keep a clear line of communication open.

Thirdly, this decision raises some questions for us and though we acknowledge that at this stage you would not have responses to these we find it prudent to broach them now (see below) to minimise the implications for the continued operation or our club.

- Design of the building to fit our needs,
- Location of new building,
- Storage of equipment whilst works are being carried out,
- Space for the club to use whilst works are being carried out,
- Will there be an increase in rental costs to the MRSC?

We look forward to working closely with the MRSC to continue our valued community work.

Please share your feedback.	we'd like to see included: - a free EV charging station at the Woodend information centre, or anywhere in the Shire - definitely more bike paths - more footpaths - women's change room at Kyneton District Soccer Club - more commitment from Council around climate change actions, in particular looking at the emissions from food production. Could Council lead the way and use only plant-based caterers or something similar

Draft Budget/Revenue and Rating Plan Feedback

Dear Sir/Madam,

In response to your invitation to provide feedback on the Draft Budget/Revenue and Rating Plan Feedback I provide the following submission.

Some opening observations are:

- The providing of Grants is again critical if we are to achieve the nominated operating surplus. How many of these are locked in and how certain are we that we will get those that are not.
- The projects that are representative of the additional borrowing of \$1.7 mil require review. The \$225K for the modular change rooms at Gisborne Aquatic should simply be funded as part of capital works but more cost/benefit analysis needs to be done surrounding the \$1.5mil for the Shared Trail project.
- Appropriate measurement of Councils performance still looks very 20th Century
 as this Budget fails again to tackle the need to modify and improve K.P.I.'s across
 the service aspect areas of our Strategic Priorities.
- Despite well publicised processes to reduce the number of Council Departments and the widening of some portfolios with capability to absorb more capacity of process this Budget does not fulfil any expectation that Council bloat is being addressed.
- The Budget sets out that the People, Culture and Performance department has, after exempting the CEO Office, one FT employee for every nine FT employees and one FTE employee for every eleven FTE's overall. On best practice this ratio is way over the top.
- The Executive Summary re Operating Income references yr on yr revenue Growth at approx 1.5% and then highlights population growth at 1.47% as if to align the two. If only it was that simple.

In addition to the above as follows:

Services and Service Performance Indicators

1/ Promote Health and Wellbeing.

Re Children, Youth and Families the Budget appears to assume a 'Status Quo' on Income and Expenditure which defies the outlined population demographic growth. By default these numbers indicate a reduction in funding, so in what areas will this occur?

Re Community Care the exiting of a number of Aged Care services is noted however what has driven the shortfall in expenditure recovery? Is this an example of unrecoverable costs due to cost shifting in the first place?

Re Recreation there are positive signs that Council is moving to solicit income in these areas.

Re Regulatory Compliance there is no real concern for what is necessary, but rather for the opportunity it creates for Cost Shifting from other Govt jurisdictions to Council. Some examples of Cost shifting can and do include School Crossing Supervisors, Some matters relating to Waste Water Management and the slashing of Roadsides for fire and hazard reduction. This budget appears to make NO attempt to exert change here and as a result a conservative 40% of the expected deficit (\$690K approx) is simple washed through to the ratepayer. What are we doing about this?

Service Performance Outcomes Indicators should also be explored for School Crossing Supervisors and certainly developed as a priority for Regulatory Compliance around Hazard Management and Roadside slashing.

2/ Protect the Natural Environment

Service Performance Indicators can no longer be limited to Waste Reduction and Waste diversion. Given its cost a measurement of outcome must be included for the Gisborne Fields project. Measurement also needs to include the Cool Changes program. Climate Change initiatives and Cool Changes programs are not a license to spend without accountability for cost/benefit outcomes within the parameters of local Govt jurisdiction and responsibility.

Given the expenditure surrounding Resource Recovery and its measurement Council needs to include in its initiatives increased focus and messaging surrounding waste contamination and how we avoid it. We must see cost benefit returned to the ratepayer for the front end sortation of household waste. If you are going to measure it then you need to drive better outcome. The ratepayer doesn't have continued deep pockets to pay the shortfall.

3/ Improve the Built Environment

With approx \$12.8mil of deficit in the services of this Strategic Priority the two service performance outcome indicators measured doesn't pass the pub test to say the least. Big cost area with little public measurement of outcome.

Waste does go unchallenged.

An example lies with Engineering, Roads and Asset Maintenance. Why did the initial stormwater work in Mahoneys Rd Riddells Creek require a complete rework? Who failed the ratepayer here and at what cost?

How did Statutory Planning and Building not make requirements for the developers of the residential properties in the very same street meet stormwater discharge requirements in the first place?

Many applications for residential development continue to be passed despite widespread growing opposition. This indicates regulation is not in step with society views yet this does nothing to deter Councils approach. This is a must address. Failure to do so continues to ensure consistent turnover of Elected Representatives which leads to a destabilisation of Council and a discontent of the wider community. It also adds support costs in budgets as is evident with the turnover that has occurred in the last three (3) terms.

4/ Enhance the Social and Economic Environment

A tough area impacted significantly by Covid.

More work needs to be done to enhance income opportunities once Covid and its restrictions dissipate.

Council funding here should be supported with a measurement that surrounds local job creation.

Closer scrutiny of initiatives is necessary particularly after this years attempt at the 'Autumn Festival'. This was poorly developed, poorly communicated and was sadly lacking in business participation and left the community as a whole bewildered. We have to do a whole lot better or assign it to the dustbin of history.

5/ Deliver Strong and Reliable Government

Re Information Services our expenditure is increasing yr on yr. Where are the productivity gains that can be measured against this upcoming yrs \$500k increase? Technology cannot simply be a cost. It must demonstrate benefit.

Re Finance and Reporting I raise concern that income is diminishing yr on yr yet costs are increasing. It is impossible to accept capped rates as a reason whilst residential

constituents are rated under CIV. This makes a mockery of the whole capped rates question when residential properties values are increasing at the rate current.

What are our supplier cost measurements? How orientated are we to promoting and using local suppliers?

Overall Service Performance Outcome Indicators for Statutory Planning should be altered to include a Community Satisfaction outcome in the same way Governance and Roads outcomes are. Gone are the days where this department's service outcome is only measured on positive outcomes in VCAT.

Financial Statements

This Budget outlines \$26mil in Capital and Operating Grants. As outlined in opening observations how many of these are locked in as against those that are not yet confirmed? Money will not be as forthcoming from Federal and State Govts given the ramifications of Covid so there is a threat to this year's surplus and the forward estimates should funds not be made available. Is there a contingency?

Summary of Planned Human Resources Expenditure

The Budget employee numbers indicate 404 in total. This is way short of what was outlined at the recent Community Vision Assembly but I note that there will be a reduction in numbers now that the 'Working for Victoria' program has ended which had a contribution of some \$3mil to employee costs.

What I cannot see is what those total employee numbers were and what the added contribution was we got from them. In any case the employee cost reduction does not Nett off as there appears to be at least a \$1.3 mil shortfall.

The Summary of Planned Human Resources spending indicates some \$3.961mill is assigned to Casuals, Temporary and Other Expenditure. The budget assigns 39.4 people to this expenditure. In anybodies language this proportions \$100K to each position. Doing what and in which department?? At 10% of the total HR spend this requires more detail and far more transparency that what it currently has.

Capital Works Program

More Cost/Benefit analysis is required for the Shared Trail project.

In addition to the State Govt grant there is \$1 mil from Council Cash and another \$1.5mil in borrowings. This is significant lead in the saddle bag. What are the ongoing costs to the ratepayer going to be to maintain the Shared Trail and where are those costs allocated in the forward estimates.

The forward estimates/projections of the Budget require further detail and commentary around the \$10mil borrowing in 2022/23 for the Macedon Ranges Regional Sports precinct. Cost blow outs are front of mind here with Material and Labour component

costs increasing significantly during Covid. Further discussion with the State Govt on additional funding is now required given the change in landscape. Things have changed dramatically economically since they stumped up the promised funding in the lead up to the 2019 election.

Capital Works funding appears disproportionate to ratepayer contributions particularly in the East Ward. Why is that and when can we expect our share? Street Tree plantar boxes and fence picket replacement offers little in the scheme of things.

Capital Works Carried Forward fails to identify the Footpath work on Bolithos Rd from Main Rd to Mahoneys Rd. This was allocated in last year's budget but not undertaken. This is not the first time things have not carried over. Footpath/Footbridge work over the Main Drain/Murnong Creek adjacent the Bakery allocated two years ago simply disappeared.

Rates

The General rate for residential properties, whilst decreasing does not go far enough and in these tough times it questions the moral thread of Council.

With property values increasing significantly again this year and Council enjoying the now yearly valuation cycle there is again no respite for Residential ratepayers under the Capital Improved Value model. I anticipate a minimum 8%-10% increase as a result and this comes after a 10.43% increase just in the General Rate last year. Your assessment of an average 3.2% (including Waste) is spin and will, like last year, be way off the pace.

Ask yourselves what year a Residential Ratepayer on an 800 sq m block is asked to pay \$3500 in rates. With no end in site to property price increases I'll guarantee we get there well before the expiration of the current budget forward estimates.

The 3% increase in Municipal charge reinforces the concerns about unaddressed Council Admin bloat. This is a definite blight on this Council particularly at a time where increased property values are providing you with a windfall.

As to Kerbside Collection and recycling a 16.94% increase this year demonstrates we have been sold a real lemon on this. Your assessment outlined in the Executive Summary of an approx 10.7% increase per property for the three reasons outlined suggests you need to adopt a new payment concept.

Your reasons are:

- Environmental Protection Authority (EPA) levy on landfill increased by \$42 per tonne
- recycling costs greater when impacted by contamination
- Higher cost to deliver kerbside collection service for rural properties.

To be honest residents have never done more to avoid waste going to landfill. Recycling going to Landfill as a result of contamination is a messaging issue. If this is happening then it's because you are failing us in direction. The money you are wasting with your bin police would be better spent on education. Councils own website is not adequate in its identifying of true recyclables. To many, hard plastics are all recyclable. It's the same with some Tetrapaks. Many think they are all the same too. You have some work to do in this space yet this Budget is silent on a process and an appropriate measurement to go with it.

As to collection costs for rural properties being higher does this suggest our whole area, 45mins from the CBD, is rural or does this refer to residents within our Shire that are more remote on properties?

The sooner you move away from the one size fits all levy approach to Kerbside collection the better. You should apply yourself to finding a user pays solution that rewards and rebates residents for improved outcomes or reduced collection volumes rather than punishing them for the ignorance of others' failure to address.

Conclusion.

It is my view that this Budget needs some rework. It needs more detailed explanation to support its assumptions. It must reconsider the strength of the business cases that surround its borrowings given the changes in economic circumstances. It also needs to embrace change by implementing stronger measurement accountabilities and Key Performance Indicators in the Strategic Priority Service areas but......above all it needs to embrace its ratepayers with more empathy on their cost contributions. Their pockets are no longer deep enough.

Look forward to your response.

Yours Sincerely

Please share your feedback.	Woodend Five Mile Creek is in desperate need of a thorough cleanout of silt build up and removal of excessive weeds including massive tracts of blackberries, fallen trees and general rubbish dumped in the creek. All of these items are detrimental to the health of the creek. The last time Five Mile Creek was thoroughly cleaned was post the Ash Wednesday Fires 38 years ago. Since then it has been allowed to deteriorate to a disgraceful level. I have watched the water level fall significantly and struggle to flow properly. In short I believe the creek is dying. There appears to be no funding in this proposed budget to do anything to improve the state of the creek despite me contacting both Council representatives in our Ward and appropriate council staff about this issue and having extensive discussions with them. Please act before it is too late.

Please share your feedback.	As a president, I fully support the lighting upgrade at Lancefield Rec Reserve. This will be a great asset for the town, not just the football club. Lancefield Cricket Club has 50% female participation. The lighting upgrade will ensure equal times for training will be available for ALL PLAYERS. The Rec Reserve is a very busy space. With the football club, Cricket Club and various exercise groups/bot camps all competing for space, it's imperative that our infrastructure keeps up with the demand.

Response to Draft Budget 2021-22

Dear Macedon Ranges Councillors, CEO and Council Officers,

the **Woodend Community Centre Proposal** we thank the Council for some funding allocation for this project in the 2021-22 Draft Budget; for the purpose of undertaking the review of planning and regulatory permits to ensure the project is funding ready for future year's budgets.

We are pleased the Masterplan and Business Case were endorsed by your May 11 Council Meeting, allowing the project to proceed. We know there is strong community support for this project. Investment by Council in this current Budget will ensure it can move forward in the review of architectural input and site surveying allowing it to be ready for investment opportunities in 2022.

Investment by Council now will ensure design development continues and will demonstrate Council's support and will help maintain community enthusiasm.

We look forward to continuing our working relationship with Council on this significant Shire project.

Best regards
